Technologies employed may be ATM, DSL, DS-1, T-1, fractionalized T-1, Frame Relay, ISDN, Satellite, Cable Modem Service, Wireless, or any technology that provides an eligible telecommunications service to the public.

**ROUTERS On-premise Equipment for End-to-end Service**

In some instances, service providers may install equipment on the premises of schools or libraries as part of their provision of eligible Telecommunications Services or Internet Access. That equipment may be considered as part of the provision of end-to-end Telecommunications Services or Internet Access (and not as Internal Connections) if the applicant demonstrates that it meets all of the following criteria:

1. This service will be provided by the same service provider that provides the service, and ownership will not transfer to the schools, libraries or consortium in the future.
2. The relevant contract or lease does not include an option to purchase the equipment by the schools or libraries or consortium.
3. The schools, libraries and consortium have no contractual right to exclusive use of the equipment.
4. Up-front, non-recurring charges are less than 67% of total charges (recurring plus non-recurring charges).
5. The equipment will not be used by the schools or libraries and consortium for any purpose other than receipt of the eligible Telecommunications Services or Internet Access of which it is a part.
6. The Local Area Network for data communications of the schools or libraries are functional without dependence on the equipment.
7. Responsibility for maintaining the equipment rests with the service provider, not the schools or libraries or consortium.
